RISK FACTORS

Risks Related to the Company's Business and Industry

We have a limited operating history upon which you can evaluate our performance, and accordingly, our prospects must be considered in light of the risks that any new company encounters.

We were incorporated under the laws of Florida on August 30, 2023. Accordingly, we have no history upon which an evaluation of our prospects and future performance can be made. Our proposed operations are subject to all business risks associated with a new enterprise. The likelihood of our creation of a viable business must be considered in light of the opportunities, problems, expenses, difficulties, complications, and delays frequently encountered in connection with the launch of new products and solutions, operation in a competitive industry, and the continued development of advertising, promotions, and a corresponding client base. We anticipate that our operating expenses will increase in the near future. There can be no assurances that we will ever operate profitably. You should consider the Company's business, operations and prospects in light of the risks, expenses and challenges faced as an early-stage company.

We may face potential difficulties in obtaining capital.

We may have difficulty raising needed capital in the future as a result of, among other factors, our lack of an approved product and revenues from sales, as well as the inherent business risks associated with our company and present and future market conditions. Our business currently does not generate any sales and future sources of revenue may not be sufficient to meet our future capital requirements. We will require additional funds to execute our business strategy and conduct our operations. If adequate funds are unavailable, we may be required to delay, reduce the scope of or eliminate one or more of our [research, development or commercialization programs, product launches or marketing efforts,] any of which may materially harm our business, financial condition and results of operations.

In order for the Company to compete and grow, it must attract, recruit, retain and develop the necessary personnel who have the needed experience.

Recruiting and retaining highly qualified personnel is critical to our success. These demands may require us to hire additional personnel and will require our existing management personnel to develop additional expertise. We face intense competition for personnel. The failure to attract and retain personnel or to develop such expertise could delay or halt the development and commercialization of our product candidates. If we experience difficulties in hiring and retaining personnel in key positions, we could suffer from delays in product development, loss of customers and sales and diversion of management resources, which could adversely affect operating results. Our consultants and advisors may be employed by third parties and may have commitments under consulting or advisory contracts with third parties that may limit their availability to us.

The development and commercialization of our products/services is highly competitive.

We face competition with respect to any products that we may seek to develop or commercialize in the future. Our competitors include major companies worldwide. Many of our competitors have significantly greater financial, technical and human resources than we have and superior expertise in research and development and marketing approved products/services and thus may be better equipped than us to develop and commercialize products/services. These competitors also compete with us in recruiting and retaining qualified personnel and acquiring technologies. Smaller or early stage companies may also prove to be significant competitors, particularly

through collaborative arrangements with large and established companies. Accordingly, our competitors may commercialize products more rapidly or effectively than we are able to, which would adversely affect our competitive position, the likelihood that our products/services will achieve initial market acceptance and our ability to generate meaningful additional revenues from our products.

Quality management plays an essential role in determining and meeting customer requirements, preventing defects, improving the Company's products and services and maintaining the integrity of the data that supports the safety and efficacy of our products.

Our future success depends on our ability to maintain and continuously improve our quality management program. An inability to address a quality or safety issue in an effective and timely manner may also cause negative publicity, and a loss of customer confidence in us or our current or future products, which may result in the loss of sales and difficulty in successfully launching new products. In addition, a successful claim brought against us in excess of available insurance or not covered by indemnification agreements, or any claim that results in significant adverse publicity against us, could have an adverse effect on our business and our reputation.

The use of individually identifiable data by our business, our business associates and third parties are regulated at the state, federal and international levels.

Costs associated with information security – such as investment in technology, the costs of compliance with consumer protection laws and costs resulting from consumer fraud – could cause our business and results of operations to suffer materially. Additionally, the success of our online operations depends upon the secure transmission of confidential information over public networks, including the use of cashless payments. The intentional or negligent actions of employees, business associates or third parties may undermine our security measures. As a result, unauthorized parties may obtain access to our data systems and misappropriate confidential data. There can be no assurance that advances in computer capabilities, new discoveries in the field of cryptography or other developments will prevent the compromise of our customer transaction processing capabilities and personal data. If any such compromise of our security or the security of information residing with our business associates or third parties were to occur, it could have a material adverse effect on our reputation, operating results and financial condition. Any compromise of our data security may materially increase the costs we incur to protect against such breaches and could subject us to additional legal risk.

An intentional or unintentional disruption, failure, misappropriation or corruption of our network and information systems could severely affect our business.

Such an event might be caused by computer hacking, computer viruses, worms and other destructive or disruptive software, "cyber-attacks" and other malicious activity, as well as natural disasters, power outages, terrorist attacks and similar events. Such events could have an adverse impact on us and our customers, including degradation of service, service disruption, excessive call volume to call centers and damage to our plant, equipment and data. In addition, our future results could be adversely affected due to the theft, destruction, loss, misappropriation or release of confidential customer data or intellectual property. Operational or business delays may result from the disruption of network or information systems and the subsequent remediation activities. Moreover, these events may create negative publicity resulting in reputation or brand damage with customers.

The Company's success depends on the experience and skill of the board of directors, its executive officers and key employees.

In particular, the Company is dependent on Potluri Rajasekhar, Dave Burrells, Jerod Powell, Venkat Rao Mandava, and John Price, who are the Founders/Co-Founders of Finrock Inc, 7969 NW 2nd Street, Miami, FL 33, although there can be no assurance that it will continue to depend on the board or that they will continue to be employed by the Company for a particular period of time. The loss of any member of the board of directors or executive officer could potentially harm the Company's business, financial condition, cash flow and results of operations.

We rely on various intellectual property rights, including trademarks in order to operate our business.

Such intellectual property rights, however, may not be sufficiently broad or otherwise may not provide us with a significant competitive advantage. In addition, the steps that we have taken to maintain and protect our intellectual property may not prevent it from being challenged, invalidated, circumvented or designed-around, particularly in countries where intellectual property rights are not highly developed or protected. In some circumstances, enforcement may not be available to us because an infringer has a dominant intellectual property position or for other business reasons, or countries may require compulsory licensing of our intellectual property. Our failure to obtain or maintain intellectual property rights that convey competitive advantage, adequately protect our intellectual property or detect or prevent circumvention or unauthorized use of such property, could adversely impact our competitive position and results of operations. We also rely on nondisclosure and noncompetition agreements with employees, consultants and other parties to protect, in part, trade secrets and other proprietary rights. There can be no assurance that these agreements will adequately protect our trade secrets and other proprietary rights and will not be breached, that we will have adequate remedies for any breach, that others will not independently develop substantially equivalent proprietary information or that third parties will not otherwise gain access to our trade secrets or other proprietary rights.

As we expand our business, protecting our intellectual property will become increasingly important. The protective steps we have taken may be inadequate to deter our competitors from using our proprietary information. In order to protect or enforce our patent rights, we may be required to initiate litigation against third parties, such as infringement lawsuits. Also, these third parties may assert claims against us with or without provocation. These lawsuits could be expensive, take significant time and could divert management's attention from other business concerns. The law relating to the scope and validity of claims in the technology field in which we operate is still evolving and, consequently, intellectual property positions in our industry are generally uncertain. We cannot assure you that we will prevail in any of these potential suits or that the damages or other remedies awarded, if any, would be commercially valuable.

From time to time, third parties may claim that one or more of our products or services infringe their intellectual property rights.

Any dispute or litigation regarding patents or other intellectual property could be costly and time-consuming due to [the complexity of our technology and] the uncertainty of intellectual property litigation which could divert our management and key personnel from our business operations. A claim of intellectual property infringement could force us to enter into a costly or restrictive license agreement, which might not be available under acceptable terms or at all, could require us to redesign our products, which would be costly and time-consuming, and/or could subject us to an injunction against development and sale of certain of our products or services. We may have to pay substantial damages, including damages for past infringement if it is ultimately determined that our products infringe on a third party's proprietary right. Even if

these claims are without merit, defending a lawsuit takes significant time, may be expensive and may divert management's attention from other business concerns. Any public announcements related to litigation or interference proceedings initiated or threatened against us could cause our business to be harmed. Our intellectual property portfolio may not be useful in asserting a counterclaim, or negotiating a license, in response to a claim of intellectual property infringement. In certain of our businesses we rely on third party intellectual property licenses and we cannot ensure that these licenses will be available to us in the future on favorable terms or at all.

Although dependent on certain key personnel, the Company does not have any key man life insurance policies on any such people.

The Company is dependent on Potluri Rajasekhar, Dave Burrells, Jerod Powell, Venkat Rao Mandava, and John Price, who are the Founders/Co-Founders of Finrock Inc in order to conduct its operations and execute its business plan, however, the Company has not purchased any insurance policies with respect to those individuals in the event of their death or disability. Therefore, if any of Potluri Rajasekhar, Dave Burrells, Jerod Powell, Venkat Rao Mandava, and John Price, who are the Founders/Co-Founders of Finrock Inc. become disabled, the Company will not receive any compensation to assist with such person's absence. The loss of such person could negatively affect the Company and its operations.

We have not prepared any audited financial statements.

Therefore, you have no audited financial information regarding the Company's capitalization or assets or liabilities on which to make your investment decision. If you feel the information provided is insufficient, you should not invest in the Company.

We are subject to income taxes as well as non-income based taxes, such as payroll, sales, use, value-added, net worth, property and goods and services taxes, in both the U.S. and various foreign jurisdictions.

Significant judgment is required in determining our provision for income taxes and other tax liabilities. In the ordinary course of our business, there are many transactions and calculations where the ultimate tax determination is uncertain. Although we believe that our tax estimates are reasonable: (i) there is no assurance that the final determination of tax audits or tax disputes will not be different from what is reflected in our income tax provisions, expense amounts for non-income based taxes and accruals and (ii) any material differences could have an adverse effect on our financial position and results of operations in the period or periods for which determination is made.

We are not subject to Sarbanes-Oxley regulations and lack the financial controls and safeguards required of public companies.

We do not have the internal infrastructure necessary, and are not required, to complete an attestation about our financial controls that would be required under Section 404 of the Sarbanes-Oxley Act of 2002. There can be no assurance that there are no significant deficiencies or material weaknesses in the quality of our financial controls. We expect to incur additional expenses and diversion of management's time if and when it becomes necessary to perform the system and process evaluation, testing and remediation required in order to comply with the management certification and auditor attestation requirements.

We face risks related to health epidemics and other outbreaks, which could significantly disrupt the Company's operations and could have a material adverse impact on us.

The outbreak of pandemics and epidemics could materially and adversely affect the Company's business, financial condition, and results of operations. If a pandemic occurs in areas in which we have material operations or sales, the Company's business activities originating from affected areas, including sales, materials, and supply chain-related activities, could be adversely affected. Disruptive activities could include the temporary closure of facilities used in the Company's supply chain processes, restrictions on the export or shipment of products necessary to run the Company's business, business closures in impacted areas, and restrictions on the Company's employees' or consultants' ability to travel and to meet with customers, vendors or other business relationships. The extent to which a pandemic or other health outbreak impacts the Company's results will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of a virus and the actions to contain it or treat its impact, among others. Pandemics can also result in social, economic, and labor instability which may adversely impact the Company's business.

If the Company's employees or employees of any of the Company's vendors, suppliers or customers become ill or are quarantined and in either or both events are therefore unable to work, the Company's operations could be subject to disruption. The extent to which a pandemic affects the Company's results will depend on future developments that are highly uncertain and cannot be predicted.

Changes in government regulation could adversely impact our business.

The internet fintech industry is subject to extensive legislation and regulation at the federal and local levels and, in some instances, at the state level. Additionally, our products and services are also subject to regulation, licensing, and additional regulation is under consideration. Many aspects of such regulations are currently the subject of judicial and administrative proceedings, legislative and administrative proposals, and lobbying efforts by us and our competitors. Legislation under consideration could entirely rewrite our principal regulatory statute, and the SEC and/or Congress and/or Govt in respective jurisdiction/country of operation may attempt to change the classification of or change the way that our products and our services are regulated and/or change the framework under which new generation fintechs, digital asset trading platforms, wealth techs, exchanges, and tokenization of asset platforms operate—and changing rights and obligations of our competitors. We expect that court actions and regulatory proceedings will continue to refine our rights and obligations under applicable federal, state and local laws, which cannot be predicted. Modifications to existing requirements or imposition of new requirements or limitations could have an adverse impact on our business.

New technologies may make our products and services highly competitive.

New and emerging technological advances may impact the demand for our products and services. The increasing competition from traditional banks and financial institutes due to the adoption of new technological advances may make individuals less likely to purchase or subscribe to our services. The Company devotes substantial resources on technology, innovation, and R&D, but there can be no assurance that the Company's efforts to innovate and develop disruptive products will be successful. Our success can depend on new product development and innovation. The fintech industry is ever-changing as new technologies are introduced. Advances in technology, such as new digital ledger, blockchain, embedded, and immersive technologies; or certain changes in consumer behavior driven by these or other technologies and methods of delivery, could have a negative effect on our business. These changes could lower cost barriers

for our competitors desiring to enter into, or expand their presence in, the interactive services business. Increased competition may adversely affect our business and results of operations.

Piracy of the Company's content may decrease the revenues received from the sale of our content and adversely affect our businesses.

The piracy of our content, products and other intellectual property poses significant challenges for us. Technological developments, such as the proliferation of cloud-based storage and streaming, increased broadband Internet speed and penetration and increased speed of mobile data transmission have made it easier to create, transmit, distribute and store high quality unauthorized copies of content in unprotected digital formats, which has in turn encouraged the creation of highly scalable businesses that facilitate, and in many instances financially benefit from, such piracy. Piracy is particularly prevalent in many parts of the world that lack effective copyright and technical legal protections or enforcement measures, and illegitimate operators based in these parts of the world can attract viewers from anywhere in the world. The proliferation of unauthorized copies and piracy of the Company's content, products and intellectual property or the products it licenses from others could result in a reduction of the revenues that the Company receives from the legitimate sale, licensing and distribution of its content and products. The Company devotes substantial resources to protecting its content, products and intellectual property, but there can be no assurance that the Company's efforts to enforce its rights and combat piracy will be successful.

We derive substantial revenues from the sale of advertising, and a decrease in overall advertising expenditures could lead to a reduction in the amount of advertising that companies are willing to purchase and the price at which they purchase it.

In the web3/crypto industry, substantial revenues are generated through various avenues such as partnerships, and platform usage fees. However, our revenue streams are subject to fluctuations influenced by the volatility and market sentiment prevalent within the cryptocurrency space.

The revenue we generate heavily depends on the market demand for cryptocurrencies and the willingness of investors and users to engage with new projects or platforms. Fluctuations in the overall market sentiment, regulatory changes, or technological advancements may lead to uncertainties in revenue streams. Similar to advertising expenditures in traditional industries, spending within the crypto space can also be cyclical and affected by economic conditions. Market downturns or uncertainties could result in reduced investment appetites, impacting token sales, partnerships, and platform usage fees. Additionally, certain sectors within the crypto industry, such as decentralized finance (DeFi) or non-fungible tokens (NFTs), might be more susceptible to market fluctuations, affecting our revenue from these specific segments. Furthermore, changes in consumer behavior and market conditions could indirectly influence our revenue. A decline in consumer interest in cryptocurrency-related products or services during economic downturns could lead to a decrease in platform usage or investment, affecting our revenue streams. Therefore, our revenue projections within the web3/crypto industry are subject to considerable fluctuations and unpredictability, primarily driven by the volatile nature of the market, changes in regulatory landscapes, and shifts in user preferences and economic conditions.

Risks Related to the Securities

The Units of Common Stock will not be freely tradable until one year from the initial purchase date. Although the Units of Common Stock may be tradable under federal securities law, state securities regulations may apply and each Purchaser should consult with his or her attorney.

You should be aware of the long-term nature of this investment. There is not now and likely will not be a public market for the Units of Common Stock. Because the Units of Common Stock have not been registered under the Securities Act or under the securities laws of any state or non-United States jurisdiction, the Units of Common Stock have transfer restrictions and cannot be resold in the United States except pursuant to Rule 501 of Regulation CF. It is not currently contemplated that registration under the Securities Act or other securities laws will be affected. Limitations on the transfer of the Units of Common Stock may also adversely affect the price that you might be able to obtain for the Units of Common Stock in a private sale. Purchasers should be aware of the long-term nature of their investment in the Company. Each Purchaser in this Offering will be required to represent that it is purchasing the Securities for its own account, for investment purposes and not with a view to resale or distribution thereof.

Neither the Offering nor the Securities have been registered under federal or state securities laws, leading to an absence of certain regulation applicable to the Company.

No governmental agency has reviewed or passed upon this Offering, the Company or any Securities of the Company. The Company also has relied on exemptions from securities registration requirements under applicable state securities laws. Investors in the Company, therefore, will not receive any of the benefits that such registration would otherwise provide. Prospective investors must therefore assess the adequacy of disclosure and the fairness of the terms of this Offering on their own or in conjunction with their personal advisors.

No Guarantee of Return on Investment

There is no assurance that a Purchaser will realize a return on its investment or that it will not lose its entire investment. For this reason, each Purchaser should read the Form C and all Exhibits carefully and should consult with its own attorney and business advisor prior to making any investment decision.

A majority of the Company is owned by a small number of owners.

Prior to the Offering the Company's current owners of 20% or more beneficially own up to 81% of the company. Subject to any fiduciary duties owed to our other owners or investors under Florida law, these owners may be able to exercise significant influence over matters requiring owner approval, including the election of directors or managers and approval of significant Company transactions, and will have significant control over the Company's management and policies. Some of these persons may have interests that are different from yours. For example, these owners may support proposals and actions with which you may disagree. The concentration of ownership could delay or prevent a change in control of the Company or otherwise discourage a potential acquirer from attempting to obtain control of the Company, which in turn could reduce the price potential investors are willing to pay for the Company. In addition, these owners could use their voting influence to maintain the Company's existing management, delay or prevent changes in control of the Company, or support or reject other management and board proposals that are subject to owner approval.

The Company has the right to extend the Offering deadline.

The Company may extend the Offering deadline beyond what is currently stated herein. This means that your investment may continue to be held in escrow while the Company attempts to raise the Minimum Amount even after the Offering deadline stated herein is reached. Your investment will not be accruing interest during this time and will simply be held until such time as the new Offering deadline is reached without the Company receiving the Minimum Amount, at which time it will be returned to you without interest or deduction, or the Company receives the Minimum Amount, at which time it will be released to the Company to be used as set forth herein. Upon or shortly after release of such funds to the Company, the Securities will be issued and distributed to you.

There is no present market for the Securities and we have arbitrarily set the price.

We have arbitrarily set the price of the Securities with reference to the general status of the securities market and other relevant factors. The Offering price for the Securities should not be considered an indication of the actual value of the Securities and is not based on our net worth or prior earnings. We cannot assure you that the Securities could be resold by you at the Offering price or at any other price.

Your ownership of the shares of stock will be subject to dilution.

Owners do not have preemptive rights. If the Company conducts subsequent Offerings of or Securities convertible into, issues shares pursuant to a compensation or distribution reinvestment plan or otherwise issues additional shares, investors who purchase shares in this Offering who do not participate in those other stock issuances will experience dilution in their percentage ownership of the Company's outstanding shares. Furthermore, shareholders may experience a dilution in the value of their shares depending on the terms and pricing of any future share issuances (including the shares being sold in this Offering) and the value of the Company's assets at the time of issuance.

The Securities will be equity interests in the Company and will not constitute indebtedness.

The Securities will rank junior to all existing and future indebtedness and other non-equity claims on the Company with respect to assets available to satisfy claims on the Company, including in a liquidation of the Company. Additionally, unlike indebtedness, for which principal and interest would customarily be payable on specified due dates, there will be no specified payments of dividends with respect to the Securities and dividends are payable only if, when and as authorized and declared by the Company and depend on, among other matters, the Company's historical and projected results of operations, liquidity, cash flows, capital levels, financial condition, debt service requirements and other cash needs, financing covenants, applicable state law, federal and state regulatory prohibitions and other restrictions and any other factors the Company's board of directors deems relevant at the time. In addition, the terms of the Securities will not limit the amount of debt or other obligations the Company may incur in the future. Accordingly, the Company may incur substantial amounts of additional debt and other obligations that will rank senior to the Securities.

There can be no assurance that we will ever provide liquidity to Purchasers through either a sale of the Company or a registration of the Securities.

There can be no assurance that any form of merger, combination, or sale of the Company will take place, or that any merger, combination, or sale would provide liquidity for Purchasers. Furthermore, we may be unable to register the Securities for resale by Purchasers for legal, commercial, regulatory, market-related or other reasons. In the event that we are unable to effect

a registration, Purchasers could be unable to sell their Securities unless an exemption from registration is available.

The Company does not anticipate paying any cash dividends for the foreseeable future.

The Company currently intends to retain future earnings, if any, for the foreseeable future, to repay indebtedness and to support its business. The Company does not intend in the foreseeable future to pay any dividends to holders of its shares.

In addition to the risks listed above, businesses are often subject to risks not foreseen or fully appreciated by the management. It is not possible to foresee all the risks that may affect us. Moreover, the Company cannot predict whether the Company will successfully effectuate the Company's current business plan. Each prospective Purchaser is encouraged to carefully analyze the risks and merits of an investment in the Securities and should take into consideration when making such analysis, among other, the Risk Factors discussed above.

THE SECURITIES OFFERED INVOLVE A HIGH DEGREE OF RISK AND MAY RESULT IN THE LOSS OF YOUR ENTIRE INVESTMENT. ANY PERSON CONSIDERING THE PURCHASE OF THESE SECURITIES SHOULD BE AWARE OF THESE AND OTHER FACTORS SET FORTH IN THIS FORM C AND SHOULD CONSULT WITH HIS OR HER LEGAL, TAX AND FINANCIAL ADVISORS PRIOR TO MAKING AN INVESTMENT IN THE SECURITIES. THE SECURITIES SHOULD ONLY BE PURCHASED BY PERSONS WHO CAN AFFORD TO LOSE ALL OF THEIR INVESTMENT.

If the sum of the investment commitments does not equal or exceed the Minimum Amount by the Offering Deadline, no Securities will be sold in the Offering, investment commitments will be cancelled and committed funds will be returned to potential investors without interest or deductions. The Company has the right to extend the Offering Deadline at its discretion. The Company will accept investments in excess of the Minimum Amount up to \$2,000,000 (the "Maximum Amount") and the additional Securities will be allocated on a Pro-rata basis.

The price of the Securities does not necessarily bear any relationship to the asset value, net worth, revenues or other established criteria of value, and should not be considered indicative of the actual value of the Securities.

In order to purchase the Securities you must make a commitment to purchase by completing the Subscription Agreement. Purchaser funds will be held in escrow with Bank Vista, until the Minimum Amount of investments is reached. Purchasers may cancel an investment commitment until 48 hours prior to the Offering Deadline or the Closing, whichever comes first using the cancellation mechanism provided by the Intermediary. The Company will notify Purchasers when the Minimum Amount has been reached. If the Company reaches the Minimum Amount prior to the Offering Deadline, it may close the Offering at least five (5) days after reaching the Minimum Amount and providing notice to the Purchasers.

If any material change (other than reaching the Minimum Amount) occurs related to the Offering prior to the Offering Deadline, the Company will provide notice to Purchasers and receive reconfirmations from Purchasers who have already made commitments. If a Purchaser does not reconfirm his or her investment commitment after a material change is made to the terms of the Offering, the Purchaser's investment commitment will be canceled and the committed funds will be returned without interest or deductions. If a Purchaser does not cancel an investment commitment before the Minimum Amount is reached, the funds will be released to the Company upon closing of the Offering and the Purchaser will receive the Securities in exchange for his or her investment. Any Purchaser funds received after the initial closing will be released to the Company upon a subsequent closing and the Purchaser will receive Securities via Digital Registry in exchange for his or her investment as soon as practicable thereafter.

Subscription Agreements are not binding on the Company until accepted by the Company, which reserves the right to reject, in whole or in part, in its sole and absolute discretion, any subscription. If the Company rejects all or a portion of any subscription, the applicable prospective Purchaser's funds will be returned without interest or deduction.

The price of the Securities was determined arbitrarily. The minimum amount that a Purchaser may invest in the Offering is \$100.00.

The Offering is being made through ChainRaise, the Intermediary. The following two fields below set forth the compensation being paid in connection with the Offering.

AUDITOR'S RESPONSIBILITY

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted the audit in accordance with generally accepted auditing standards as accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit includes performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. Examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements is also executed.

An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for my audit opinion.

3 Representations of Investor.

In connection with the sale of the Units of Common Stock to me, I hereby acknowledge and represent to the Company as follows: I hereby acknowledge receipt of a copy of the FORM-C, dated on or about February 13, 2024, (the "Memorandum"), relating to the offering of the Units of Common Stock.

- a. I have carefully read the Memorandum, including the section entitled "Risks Factors", and have relied solely upon the Memorandum and investigations made by me or my representatives in making the decision to invest in the Company. I have not relied on any other statement or printed material given or made by any person associated with the offering of the Units of Common Stock.
- b. I have been given access to full and complete information regarding the Company (including the opportunity to meet with the CEO of the Company and review all the documents described in the Memorandum and such other documents as I may have requested in writing) and have utilized such access to my satisfaction for the purpose of obtaining information in addition to, or verifying information included in, the Memorandum.

I believe the investment is suitable for me based on my investment objectives and financial needs. I have adequate means for providing for my current financial needs and personal contingencies and have no need for liquidity of investment with respect to the Units of Common Stock. I can bear the economic risk of an investment in the Units of Common Stock for an indefinite period of time and can afford a complete loss of such investment.

My financial condition is such that it is not likely that it will be necessary for me to dispose of any of the Units of Common Stock in the foreseeable future.
- c. I am aware that, in the view of the Securities and Exchange Commission, a purchase of securities with an intent to resell by reason of any foreseeable specific contingency or anticipated change in market values, or any change in the condition of the Company or its business, or in connection with a contemplated liquidation or settlement of any loan obtained for the acquisition of any of the Units of Common Stock and for which the Units of Common Stock were or may be pledged as security would represent an intent inconsistent with the investment representations set forth above.
- d. Hi. I'm excited to introduce you to Finrock, a fintech enterprise poised to redefine wealth creation through transformative technologies.

Today's fintech landscape is centralized and complex, controlled by a few entities. This leads to volatility, limited investment choices, high rates, and less flexibility across asset classes.

We're empowering customer prosperity by granting access to digital and real-world assets in a fractional and tokenized manner. Our fully integrated platform, leveraging AI, offers diverse investment opportunities and simplified management.

We're pioneering a future of investing, ensuring safety, transparency, and automation. Our solutions, including AI-driven insights and on-chain asset management, unlocking the digital economy.

We're building a next-gen fintech enterprise that leverages Web3, AI, and blockchain to revolutionize investment management. We aim to raise \$2 million as a Pre-Seed investment at a \$20 million valuation.

The DeFi and web3 markets alone are projected to surge globally, from the current market valued at \$160 billion in 2022 to the tokenization of Real-World Assets, expected

to hit a staggering \$42 trillion by 2030. These figures demonstrate the immense scope for growth and profitability within the evolving fintech landscape, positioning Finrock as a strategic investment choice.
